SUMMARY

CDAC Big Data Analytics graduate with a Bachelor of Engineering in IT and hands-on experience in data analysis, data cleaning, transformation, and visualization. Skilled in Python, SQL, Pandas, NumPy, PySpark, Power BI, and Tableau, with practical experience working with large datasets, building analytical pipelines, creating dashboards, and generating business insights.

TECHNICAL SKILLS

Programming Data Analysis: Python, SQL, Pandas, NumPy, PySpark
Data Analysis: Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA), Data Validation, Aggregation
Data Visualization: Power BI, Tableau, Matplotlib, Seaborn
Databases: MySQL, PostgreSQL, Oracle
Cloud Data: AWS S3, AWS Glue, AWS Athena, ETL/ELT, Data Pipelines
Tools: Git, GitHub, Linux

PROJECTS

YouTube Trending Data Analysis – AWS Python GitHub *Apr 2026 – May 2026*
Python, SQL, Pandas, PySpark, AWS S3, AWS Glue, AWS Athena, Power BI

- Analyzed 20K+ YouTube trending video records to identify trends in views, likes, comments, categories, and regional performance for marketing insights.
- Collected and consolidated CSV/JSON data from Kaggle and the YouTube Data API, covering 10+ regions/categories for comparative analysis.
- Cleaned and transformed raw datasets using Python, SQL, and PySpark, handling missing values, data types, duplicates, and inconsistent records before analysis.
- Created analytics-ready datasets in Parquet and used AWS Athena for SQL-based analysis, reducing query scan cost/time by 90%.
- Developed visual reports to compare video engagement and identify high-performing categories and regional trends.

NaturalDub-AI – Video Audio Data Analysis Pipeline GitHub *Jun 2026 – Jul 2026*
Python, LangChain, FastAPI, Streamlit, Faster-Whisper, Pyannote Audio, Demucs, Coqui XTTS-v2, ElevenLabs, FFmpeg, Wav2Lip, Pydub, SQLite

- Designed a LangChain-based human-in-the-loop pipeline (Python, FastAPI, Streamlit) that processed 500+ minutes of video, automating Hindi video dubbing end-to-end.
- Built a media pipeline (FFmpeg, Demucs, Faster-Whisper, Pyannote Audio, IndicTrans2, XTTS-v2) handling audio separation, transcription, diarization, translation, and speech synthesis with 92% transcription accuracy.
- Engineered a 3-tier voice cloning workflow with audio-video sync (Pydub, Wav2Lip), reducing manual sync correction time by 65%.
- Implemented SQLite-based workflow state tracking and automated QA checks, cutting pipeline failure rate to under 4%.

WORK EXPERIENCE

Internship Trainee – QSpiders *Aug 2025 – Jan 2026*

- Completed a 6-month internship using Python, SQL, HTML, CSS, and JavaScript, contributing to application features and database operations across 5+ modules.
- Performed data analysis using Python, SQL, and Power BI, building 15+ dashboards and reports for data extraction, transformation, visualization, and business reporting.

AI-ML Virtual Intern – Google for Developers *Jul 2024 – Sep 2024*
AICTE NEAT Initiative

- Completed a 10-week AI/ML virtual internship covering core AI/ML concepts and algorithms through structured, project-based coursework.

EDUCATION

Centre for Development of Advanced Computing (CDAC), Mumbai *2026 – 2026*
PG Certificate Programme in Big Data Analytics (PG-CP BDA)

Vasantdada Patil Pratishthan's College of Engineering, Mumbai *2021 – 2025*
Bachelor of Engineering in Information Technology

V.G. Vaze College of Arts, Science and Commerce *2019 – 2021*
HSC Science, Maharashtra Board
