SUMMARY

CDAC Big Data Analytics graduate with a Bachelor of Engineering in IT and hands-on experience in data engineering, ETL/ELT pipelines, cloud-based solutions. Skilled in Python, SQL, PySpark, AWS with practical experience in implementing Medallion Architecture, data transformation, cleansing, validation, and analytics-ready datasets.

TECHNICAL SKILLS

Programming & Data: Python, SQL, NumPy, Pandas, PySpark
Data Engineering: ETL/ELT, Data Pipelines, Medallion Architecture, Hive, Kafka, Hadoop, HBase, Cloud (AWS)
Databases: MySQL, PostgreSQL, Oracle
Data Visualization: Power BI, Tableau, Matplotlib, Seaborn
Tools: Git, GitHub, Linux

PROJECTS

NATURALDUB-AI – Multi-Agent AI Movie Dubbing Pipeline GitHub *Jun 2026 – Jul 2026*
Python, LangChain, FastAPI, Streamlit, Faster-Whisper, Pyannote Audio, Demucs, Coqui XTTS-v2, ElevenLabs, FFmpeg, Wav2Lip, Pydub, SQLite

- Designed a LangChain-based human-in-the-loop pipeline (Python, FastAPI, Streamlit) that processed 500+ minutes of video, automating Hindi video dubbing end-to-end.
- Built a media pipeline (FFmpeg, Demucs, Faster-Whisper, Pyannote Audio, IndicTrans2, XTTS-v2) handling audio separation, transcription, diarization, translation, and speech synthesis with 92% transcription accuracy.
- Engineered a 3-tier voice cloning workflow with audio-video sync (Pydub, Wav2Lip), reducing manual sync correction time by 65%.
- Implemented SQLite-based workflow state tracking and automated QA checks, cutting pipeline failure rate to under 4%.

AWS-Based End-to-End Data Engineering Pipeline GitHub *Apr 2026 – May 2026*
AWS S3, AWS Glue, AWS Athena, AWS Lambda, AWS Step Functions, Amazon SNS, PySpark, SQL

- Architected a 3-layer Medallion Architecture pipeline (Bronze, Silver, Gold) processing 20K+ YouTube trending video records into analytics-ready datasets for marketing insights.
- Ingested raw CSV/JSON data from Kaggle and the YouTube Data API into a centralized S3 data lake, covering 10+ regions/categories of trending data.
- Built AWS Glue/PySpark transformation and validation workflows, converting raw data to Parquet and cutting query scan cost/time by 90%; queried curated datasets via AWS Athena and ran serverless transforms via Lambda.
- Orchestrated end-to-end execution with AWS Step Functions and Amazon SNS alerts, reducing manual monitoring effort by 95%.

WORK EXPERIENCE

Internship Trainee – QSpiders *Aug 2025 – Jan 2026*

- Completed a 6-month internship in Python, SQL, HTML, CSS, and JavaScript, contributing to frontend/backend features and database operations across 5+ modules.
- Performed data analysis using Python, SQL, and Power BI, building 15+ dashboards/reports for extraction, transformation, and visualization.

AI-ML Virtual Intern – Google for Developers *Jul 2024 – Sep 2024*
AICTE NEAT Initiative

- Completed a 10-week AI/ML virtual internship covering core AI/ML concepts and algorithms through structured, project-based coursework.

EDUCATION

Centre for Development of Advanced Computing (CDAC), Mumbai *2025 – 2026*
PG Certificate Programme in Big Data Analytics (PG-CP BDA)

Vasantdada Patil Pratishthan's College of Engineering, Mumbai *2021 – 2025*
Bachelor of Engineering in Information Technology

V.G. Vaze College of Arts, Science and Commerce *2019 – 2021*
HSC Science, Maharashtra Board

CERTIFICATIONS

- AWS Academy Cloud Foundations *May 2026*
- Google AI-ML Virtual Internship – AICTE NEAT Initiative *Jul 2024 – Sep 2024*
